EXPERIENCE

• XM technologies

Junior Data Analyst

Surat, IN

July 2022 – July 2024

- **Dashboards & Analytics** : Developed interactive Power BI dashboards and semantic models, enabling self-service analytics and replacing manual Excel-based reporting workflows.
- **Data Modeling & KPI Optimization** : Designed structured datasets using star schema (fact and dimension tables) and implemented DAX measures and Power Query transformations for accurate KPI reporting.
- **Data Integration & Quality Assurance** : Integrated and validated data from SQL databases and flat files, performing data cleansing and discrepancy analysis to ensure high data quality and consistency.
- **Data Pipeline & Automation** : Automated data processing and reporting workflows using Python and SQL, improving efficiency and supporting scalable analytics pipelines.

• XM technologies

Data Analytics Intern

Surat, IN

January 2022 – June 2022

- **Data Preparation & Reporting Support** : Prepared, cleaned, and validated structured datasets from multiple sources, supporting recurring analytics and reporting workflows.
- **Automation & System Support** : Improved Excel-based workflows and assisted in database updates, ensuring data accuracy and cross-system consistency.

PROJECTS

• QuantEdgeX: AI-Based Trading & Risk Intelligence System

[GitHub]

Built a real-time AI-driven analytics system using LSTM, XGBoost, and FinBERT, integrated with Azure-based pipelines and dashboards for real-time monitoring and decision support. Collaborated with cross-functional teams to translate business requirements into analytical solutions.

• Corporate Energy Consumption Analysis — Calgary

[Notion]

Analyzed large-scale energy datasets using Python, SQL, and Tableau to identify trends, optimize resource usage, and support data-driven sustainability decisions.

• Fraud Patterns and Financial Impact in Canada

[Project]

Applied time-series analysis and anomaly detection techniques to identify fraud patterns, enabling risk insights and data-driven reporting.

SKILLS

• Programming: Python, SQL, R

• Data & Analytics: Pandas, NumPy, EDA, Statistical Analysis, Data Visualization

• Machine Learning & AI: LSTM, XGBoost, Regression, Classification, NLP (FinBERT), Generative AI (basic)

• Cloud Platforms: AWS (EC2, S3, RDS), Azure (Data Factory, Blob Storage), Databricks

• Visualization Tools: Power BI, Tableau

• Tools: Git, Jupyter Notebook, VS Code

EDUCATION

• University of Calgary

Master of Data Science and Data Analytics; GPA: 3.92

Calgary, CA

September 2024 – September 2025

• Gujarat Technological University

Bachelor of Computer Science; GPA: 3.55 (8.87/10.0)

Gujarat, India

July 2018 – April 2022
